EDUCATION

B.Tech in Computer Science
Chitkara University
2017 – 2021 (CGPA: 8.6)

Certifications
UX Designer by ImaginXP
Android Nanodegree by Google
iOS Development from Udemy
SwiftUI Advanced from Udemy
Product Design from Coursera

SKILLS

- UIKit & SwiftUI
- Swift, Objective-C
- RxSwift, Combine
- Git (Version Control), GitHub Actions, YAML
- Memory management
- Auto Layout & User Interface
- Performance optimization
- Core Data, Animation & Graphics
- App Store deployment and distribution
- Third-party API integration & SDK development
- Debugging and troubleshooting
- MVC, MVVM, VIPER
- Agile development methodologies
- Unit Testing (XCTest), UI testing
- Multithreading and concurrency
- C, C++, Java, JavaScript, Kotlin
- Node.js with Express, React
- DevOps (Cloud Infrastructure, CI/CD Pipelines, Kafka)

PROFILE

Senior iOS Developer and Backend Engineer with 5+ years of experience building scalable, AI-driven, real-time mobile applications. Expert in Swift, SwiftUI, MVVM architecture, performance optimization, and CI/CD automation, delivering 30+ production apps across SaaS, fintech, and social platforms. Focused on modular, high-performance systems with seamless backend integration and measurable business impact.

PROFESSIONAL EXPERIENCE

Senior iOS Developer — Jan 2025 – Present
Zaytun AI LLC, Remote (California, US) — Zaytun AI -Social

AI-powered social and community platform tailored for the Muslim community, combining culturally aligned content, AI moderation, and real-time engagement.

- Led end-to-end iOS development using MVVM modular architecture with reusable, component-based UI.
- Built real-time live streaming (TikTok-style) and full social features (feed, share, explore, profiles, engagement, messaging).
- Implemented AI-driven cultural moderation and contextual AI assistant for Islamic lifestyle guidance.
- Optimized performance via lazy loading, pagination, caching, and efficient state management. Implemented multi-language support and a centralized Dark/Light theme system.
- Automated CI/CD using GitHub Actions (AI PR review + auto-release).
- Implemented full social ecosystem features such as feed ranking, content sharing, profile interactions, and engagement analytics.

Senior iOS Developer — Dec 2023 – Nov 2024
Goodspace.ai, Saket, Delhi, India — Goodspace App Link

Led iOS development for an AI recruitment platform (1M+ users), optimizing performance, building AI-driven video interviews and chatbot systems, and automating CI/CD pipelines to accelerate scalable releases.

- Architected reactive UI using RxSwift, improving responsiveness and engagement.
- Optimized performance with local & server-side caching, reducing load times by 35%.
- Built an AI-driven video interview system with real-time capture and automated transcript processing.
- Developed a career-assistant chatbot, enhancing candidate preparation and retention.
- Streamlined dev-to-prod workflows and implemented CI/CD automation, accelerating release cycles.

iOS Developer
Zoconut Pvt. LTD, New Delhi — Aug 2022 – Oct 2023

Led development and deployment of 25+ white-label iOS applications, delivering fully customized, client-branded solutions in the nutrition and wellness domain.

EXPERTISE

Languages

- English – Professional
- French – A1

Technical

- Xcode, Android Studio
- Vs Code, intellij IDE
- Figma, Sketch & Adobe
- Microsoft Office

CORE COMPETENCIES

- Scalable iOS Architecture
- Performance Optimization
- Backend Integration
- System Design & Scalability
- DevOps & Automation

Production Apps

- Zaytun AI -Social
- Goodspace
- Parafit
- OJOLIFE
- Lollicash
- Zoconut
- Ediet
- 24 Holistic Health
- Nutrition Defined
- Warriors of Wellness
- Balcal Nutrefy
- Diet Enrich
- The Balanced Plate
- NutrifyMe
- Sarvodaya Wellness
- Limestag Fitness
- Nutri4Verve
- Arogyam Nutrition
- Prana Nutrition
- Fit Mantra
- NP Fitness

and more...

- Developed and maintained the core Zoconut app, an all-in-one nutrition business management platform using Swift and third-party API integrations.
- Automated build and release pipelines using Fastlane, enabling faster client onboarding and seamless app updates.
- Managed the complete app lifecycle - from architecture design and feature implementation to App Store deployment.
- Implemented client-specific feature customization while maintaining a scalable and modular codebase.
- Collaborated closely with backend developers, product managers, and UI/UX designers to translate business requirements into high-performance solutions.
- Optimized both front-end and back-end integrations to improve performance, stability, and user experience.
- Delivered white-label apps including OJOlife, 24 Holistic Health, The Balanced Plate, and more.

Mobile Application Developer

Bhanguz Software, Mohali — May 2021 - Jul 2022

Developed and deployed scalable iOS applications while expanding expertise in Node.js, cloud services, and project coordination. Contributed to fintech and education-based platforms with secure architecture and performance optimization.

- Built University Intoto, a campus management app enabling streamlined communication, student travel tracking, and community engagement for international offices.
- Developed LolliCash, a cross-border payments app similar to PayPal, integrating secure payment gateways and ensuring reliable global transactions.
- Implemented authentication systems, payment integrations, and optimized app performance to deliver a smooth and secure user experience.

Mobile Developer

ThinkNEXT Technologies · Internship — Dec 2020 - Apr 2021

Developed native iOS applications using Swift, integrating Location Services, Authentication, Maps, and third-party APIs. Optimized network calls and custom components for improved performance and scalability. Translated user requirements into functional designs while following industry best practices. Gained hands-on experience in debugging, testing, and enhancing app functionality using open-source APIs.

Additional Projects

Dream Home Automation

Developed a home automation system that allows users to control existing devices with added security. The system integrates with smart devices, offering enhanced control, data privacy, and secure access, delivering both convenience and peace of mind.

Gurudai User & Rider App (Cab Booking)

Developed the Gurudai app, offering affordable cab booking for short and long distances, similar to Uber and Ola. The app features real-time location tracking, fare estimation, and secure payment integration, providing a seamless and convenient experience for both users and drivers.

CountryPickerAKS (Framework)

Streamline country selection with ease. Customize themes, add countries, and optimize lists - all tailored to your app. A simple, powerful choice for an enhanced user experience. Available for Cocoapods and SPM
